

Energy Savings Action Plan

Join your community in reducing energy waste! Start saving energy and money by completing your Energy Savings Action Plan. Yolo Energy Watch and the City of Woodland are here to help you achieve your energy savings potential!

Energy Savings Action Plan

Thank you for taking the first step to reduce your business's energy waste. Here are a few suggestions for your business that can be implemented immediately. Check off the actions you and your team can easily do and be sure to post your checklist somewhere visible. You've got this!

- Turn off lights in vacant rooms**
Turn off lights in staff/break rooms, storage rooms and vacant conference rooms. In break rooms and storage rooms, install fixtures that are activated by a motion detector.
- Keep the temperature comfortable**
Set thermostats to 78 for cooling and 68 for heating.
- Plug electrical devices into power strips**
Plug workstations into a power strip. When your day is done power off the power strip for safety and savings.
- Reduce energy use in the break room**
Purchase ENERGY STAR appliances when possible. Turn off coffee pots and unplug microwaves, or plug into socket timers.
- Perform janitorial tasks during business hours**
When possible clean up your office, bathrooms, and do other tasks while you have light, instead of after hours when it's dark.
- Use energy saving light bulbs**
Look at labels when purchasing your lights. LEDs save energy and money, and provide adequate lighting - visit the California Lighting Technology Center in Davis to view different lighting options. (Rebates available through the Energy Fitness Program.)
- Other:**

We'll follow up in approximately one month so you can share your progress with us! In the meantime, follow us on Facebook for more energy savings tips for your business and home.
